

Venue: The course will take place at;

- Monday 18, Tuesday 19 FEB and morning of Wednesday 20 FEB, Conference room 1 at Hiroshima High-Precision Radiotherapy Cancer Center (HIPRAC),
- Wednesday 20 FEB afternoon, Hiroshima University Hospital
- Thursday 21 FEB

In the morning, at Hiroshima University Research Institute for Radiation Biology and Medicine (RIRBM)

In the afternoon, at Radiation Effects Research Foundation (RERF), then visit to the Peace Memorial Museum.

Objective: To update the knowledge of radiation oncologists in advance radiation therapy technology and to provide radiation oncologists with a comprehensive understanding of the clinical applications of advance radiation therapy technology for a safe and effective implementation of advance radiation therapy technology.

Learning outcomes

At the conclusion of the program, the learner will be able to:

- Explain the principles of 3D-CRT and its further technological developments
- Describe the basic physics principles behind advanced radiotherapy techniques
- Prescribe a radiotherapy dose for advanced techniques
- Demonstrate skills in target volume contouring and organs at risk
- Identify the main issues on quality and safety in modern radiotherapy.
